SUMMARY

MSc student in Natural Language Processing at MBZUAI (GPA: 3.37/4.00) with A+ performance in Machine Learning and Probabilistic & Statistical Inference and a strong competitive mathematics background. Combines solid foundations in probability, optimization, and transformer-based NLP with 3+ years of backend engineering experience. Interested in controllable text generation, large language models, and research-driven AI systems. Seeking Summer AI/NLP Internship (June–August).

EDUCATION

Mohamed bin Zayed University of Artificial Intelligence (MBZUAI)

2025–Present

MSc in Natural Language Processing

GPA: 3.37/4.00

Selected Coursework:

- Machine Learning with Python (A+)
- Probabilistic & Statistical Inference (A+)
- Mathematical Foundations of AI (A)
- Introduction to Deep Learning (A-)
- Natural Language Processing (B+)
- Speech Processing (B+)

Tashkent State University of Economics

2016–2020

BSc in Information & Communication Technologies

Grade: 87.8/100

RESEARCH & PROJECTS

Length-Controlled Abstractive Summarization with BART

- Designed a decode-time framework for controllable summarization without model fine-tuning
- Evaluated soft prompt tokens vs. hard decoding caps across 500 CNN/DailyMail validation samples
- Demonstrated that decoding caps dominate token-based steering for reliable length control
- Identified optimal quality–control trade-off at 64-token cap with near-baseline ROUGE performance
- Conducted paired t-test and bootstrap resampling to validate statistical significance

Machine Learning & Data Projects (Kaggle / GitHub)

- Built end-to-end classification workflow including feature engineering and evaluation metrics
- Performed exploratory data analysis using Pandas, NumPy, and Matplotlib
- Developed interactive visualizations using Plotly

EXPERIENCE

Backend Developer, Green White Solutions

2020–2023

- Contributed to the development of enterprise-grade HR and ERP systems used by multiple organizations
- Acted as a key backend contributor within the HR system development team, implementing high-impact business logic features using PL/SQL and Oracle Database
- Conducted pull request reviews to maintain code quality and architectural consistency

-
- Co-developed a government pharmacy licensing system in collaboration with the team lead, implementing core backend modules and regulatory business rules
 - Led migration of a legacy Telecom module to a new system architecture, ensuring data integrity and system stability
 - Strengthened system-level reasoning and scalable backend design skills transferable to ML system engineering

TECHNICAL SKILLS

ML/NLP: PyTorch, HuggingFace Transformers, Scikit-learn, Statistical Inference, Deep Learning

Programming: Python, SQL (Oracle), PL/SQL, C++, JavaScript

Data: Pandas, NumPy, Matplotlib, Plotly

Tools: Git, Jupyter Notebook, VS Code

MATHEMATICS ACHIEVEMENTS

- 1st Place – District Mathematics Olympiad (Grade 11); advanced to Regional Stage
- Regional-level award winner in Mathematics competitions
- Selected for International Mathematics Olympiad qualification round (regional level)

CERTIFICATIONS

- Oracle Certified Associate (OCA)
- HackerRank – Python (Basic)
- HackerRank – Problem Solving (Basic)
