Personal Profile

Motivated master's student in Natural Language Processing at MBZUAI with a strong foundation in computer science and prior experience in Oracle SQL and frontend development. Currently developing advanced expertise in artificial intelligence and machine learning, with hands-on projects in natural language processing, mathematics for AI, and foundational AI methods. Passionate about applying theoretical knowledge to real-world challenges, with particular interest in low-resource language processing, speech recognition, and human-AI interaction. Dedicated to continuous learning, collaborative research, and building impactful AI solutions.

Professional Skills

Programming Languages: JavaScript, HTML5, Oracle SQL, PL/SQL, Python

Frameworks: Numpy, Matplotlib, Scikit-learn, AngularJs, Bootstrap

Databases: Oracle Database 19c

Tools: Visual Studio Code, PL/SQL Developer 13, 14, 15 versions, Git & GitHub

Platforms: Windows 10

Others: Strong knowledge of the software lifecycle, Implementation of business logic, Scrum methods, Basics of ML and Deep Learning

Education

2025 - Present: Master's in Natural Language Processing

Mohamed bin Zayed University of Artificial Intelligence (MBZUAI), Abu Dhabi, UAE

- Linear algebra (eigenvalues, matrices), calculus (derivatives, integrals, optimization), probability & statistics, vector spaces, multivariate analysis.
- Text preprocessing, syntax & parsing, machine translation, language models, sentiment analysis, speech-to-text, transformer architectures (BERT, GPT).
- Search algorithms, decision trees, ensemble methods (bagging, boosting, random forests), neural networks, reinforcement learning, Bayesian inference.

2016 - 2020: BS in Information and Communication Technologies (Economics)

Tashkent State University of Economics, Tashkent, Uzbekistan

2021 Oracle University – Oracle Certified Associate

Oracle SQL Developer · Programming

Experience

Green White Solutions, January 2020 – June 2025.

Address: 1A, Asadulla Khodjaev Street, Tashkent, 100027, Uzbekistan, +998712008833, <https://www.greenwhite.uz/main-en>, <https://smartup.uz/>, <http://verifix.com/>)

Position: Backend Developer

Full-time paid

Responsible for debugging and implementing new features in the company's core products, such as ERP and Telecom systems.

Primary focus on Oracle DB, PL/SQL, JavaScript, HTML, CSS, Bootstrap, and AngularJS.

Migrated old data to new tables, involving data structure understanding, new table design, and writing efficient scripts.

Developed applications using Oracle DB and PL/SQL, collaborating with a team to meet client requirements.

Integrated front-end technologies for user-friendly interfaces.

Projects

Enterprise resource planning (SmartupX)

Project Description: This program was created to serve the automation of the distribution industry, used by many enterprises.

Project Duration: Involvement: January 2020 – July 2025

Verifix HR

Project Description: HRM solutions for HR system automation. Modules included: Attendance control, HR documentation, performance calculation, calculation of wages for given indicators and working hours.

Project Duration: Involvement: November 2020 – April 2023

Smartup5x License

Project Description: This program was created for the state unitary enterprise "State Center for Expertise and Standardization of Medicines, Medical Products and Medical Equipment", which serves to automate the licensing of pharmacies in the state.

Project Duration: Involvement: August 2020 – April 2022

Project Achievements

- Created and implemented the backend structure.
- Designed and implemented the user interfaces (UI).
- Performed Unit Tests.
- Used Programming Languages: JavaScript, HTML5, Oracle SQL, PL/SQL.
- Used Frameworks: Bootstrap 4.6, Angularjs.
- Used Databases: Oracle Database 19c.
- Used Tools: Visual Studio Code, PL/SQL Developer 13, 14, 15 versions, Apache Tomcat 8, 9 versions

Awards

2023, Bukhara: Winner of Startup Weekend event

2023, Karshi, Uzbekistan: Winner of Startup Weekend event

Skills

IELTS 6.5
